

## Dedicated exclusively to the commercial customer

At Pacific Pride, we're committed to helping commercial customers keep business moving right along; so we've made our billing system as useful and efficient as our always-open fueling sites.

## Ready when you are, to start to work

Whatever size and type of vehicles your company operates, Pacific Pride stands ready to keep them rolling. Conveniently located near commercial areas and on major arterials, our fully-automated stations carry gas and diesel fuel - and are open 24 hours a day, 365 days a year. That means no time lost searching for an open station on Sundays or holidays; whenever you need to start working, we'll get you on your way.

## Billing that puts you in control

Our billing system restricts purchase authorizations in ways that help you control and monitor fuel costs. Every card issued identifies the driver and vehicle, and permits pump access only when used with a unique security code. Fueling transaction data is collected whenever the card is inserted into our fueling site card reader, and the information sent to your company each billing period. The print-out allows close tracking of vehicle use and fuel consumption, and provides a great cost-control tool.

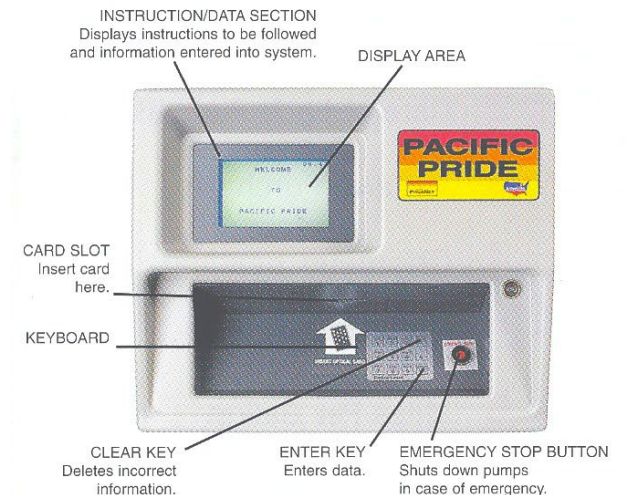

## How and Where to Use Your Card

At each of our more than 1,000 locations, Pacific Pride card-holders will find modern, convenient islands and equipment dedicated exclusively to the commercial customer. And through our agreement with AmeriNet, Pacific Pride cards may also be used at over 50 full service truck stops . . . giving your company a round-the-clock source of fueling across the continent, along with a reliable running record of fueling operations. Now, that's "Taking Control with Pride."
